Testimonials

"It was easy and smooth to integrate Empowered Brain in my general-education classroom: to benefit one student effectively, yet not disrupt the rest of the class."

"Many products mention social-emotional learning, but Brain Power's strong scientific evidence for their claims convinced me to implement this in our district."

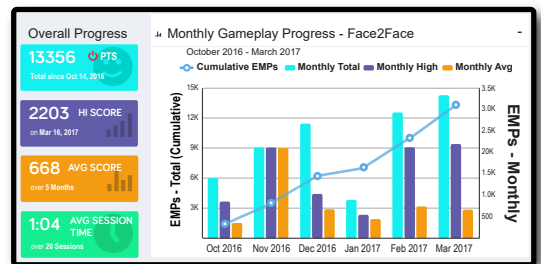

Our Solution

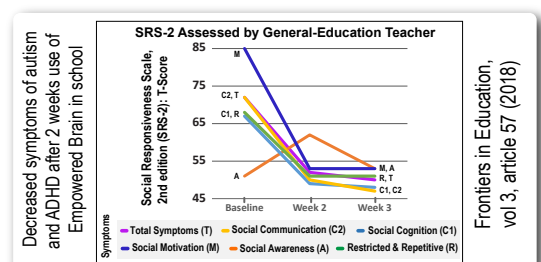

Students wear smart-glasses to receive prompts while looking up at teachers (not down at iPads).

Prompts motivate and reward SEL skills like eye-contact & emotion literacy, based on brain science.

Data on social-emotional achievement and growth:
 • Easy web dashboard. • Automated IEP reports. •

Evidence-based: Scientifically validated in clinical & in-school studies. Successful in Mass. schools now.
